

Vulnerable groups and their online lives. Support is needed across a range of online activities and experiences. All were cyberbullied considerably more than their peers with no difficulties. Red: This group is markedly more likely than peers to experience this. The presence of several factors combine to produce high risk It is essential to consider many facets of a young person's online life. Any one factor could be the presenting problem.	I am a carer	I am in or leaving care	I have a longstanding illness	I have learning difficulties	I need help with English	I have special educational needs	I have mental health difficulties	I have none of these difficulties
